I'm going to read two statements to you. Please tell me which comes closest to your opinion...

Some people say that the health mandates have worked to slow the spread of the virus, and that it's time to begin removing the mandates so that more Alaskans can go back to work and get Alaska's economy started again.

Other people say that we should keep the health mandates in place, and that removing them now would lead to increased spread of the virus and a strain on Alaska's healthcare system.
